

## Warehouse Logistics Hand in Hand

At the LogiMAT 2016 in Stuttgart TIM CONSULT presents the advantages of cooperation based on partnership.

LogiMAT, the International Trade Fair for Distribution, Materials Handling and Information Flow, sets new standards as the biggest annual intralogistics exhibition in Europe.

Between 8 and 10 March 2016 international exhibitors and decision-makers from industry, trade and the service sector will be coming together at the new exhibition centre at Stuttgart Airport to find new business partners. The focus will be on innovative products, solutions and systems for procurement, warehouse, production and distribution logistics.

Under the motto “**warehouse logistics hand in hand**” we will demonstrate that not only know-how and experience but also a cooperation based on partnership with clients are important prerequisites for successful consultancy projects. Logistics requirements and the need for improvements are as manifold and individual as the companies themselves. TIM CONSULT deals with the clients’ needs. Cooperation is characterised by **listening, thinking and support**, even beyond the remit of the original assignment.

„Hand in Hand“ means for the consultancy, that clients receive a clearly structured and transparent itinerary of the ‘common journey’. The main emphasis is on the clients’ objectives. Generally these are capacity adjustments due to growth or different market demands. Process optimisations, cost reductions and service improvements are all taken into account in all projects.

In some cases a warehouse audit fulfills the needs, in other cases a re-engineering project is advisable. If needed TIM CONSULT accompanies the whole journey to an innovative distribution centre – from strategy, conception, detailed planning, tendering, contracting and implementation to a successful go-live. The intralogistic experts offer tailor-made solutions which are based on

efficiency and scalability and offer a reliable foundation for investment decisions.

At the LogiMAT 2016 TIM CONSULT will demonstrate its understanding of “Hand in Hand”.

Process optimisations, a new WMS or maybe a new warehouse site – the experts will present in brief, how they handle consultancy projects and what clients can expect from them. With the help of **last years’ customer projects** they will prove that their approaches pass the field test at any time.
